

## 1. What is a Sub-Processor

Unifocus is a processor of personal data submitted by users of its services for processing on the Unifocus Platform. Unifocus may in turn delegate some aspects of processing to another processor, either an Affiliate or a third party: this is termed a sub-processor. A sub-processor is a data processor engaged by Unifocus which has or potentially will have access to such personal data. Unifocus engages different types of sub-processors to perform various functions as explained in the table below. Third parties used to provide the services but which do not have access to or process such personal data are not considered sub-processors.

## 2. List of Sub-processors

Knowcross Solutions Private Limited acts as a sub-processor for personal data processed on behalf of Unifocus customers through the Unifocus Platform. In addition, Unifocus engages certain unaffiliated third-party service providers to perform specific processing functions in support of its services. These unaffiliated third-party providers also act as sub-processors, as listed below.
